

The Giving Block & WIX

Install Instructions

Step 1: Become a client of The Giving Block and receive your embed code for the iFrame widget from your Client Success Representative.

Not yet a client of The Giving Block? Learn more [here](#).

Step 2: Once you have the embed code, you can add the iFrame to your WIX website using the following steps:

- Click *ADD* **+** on the left side of the Editor
- Click *Embed*
- Select *Embed a Widget* to add the iFrame to your page
- Embed your code:
 - Click *Enter Code*
 - Paste your custom HTTPS code in the text box
 - Click *Apply*

NOTE: Sometimes you might find that Wix does not allow for a widget or iframe to be embedded. This is a known issue with Wix.

In this situation you should first copy and paste an `<div>` into the embed code, followed by copying and pasting the widget, then click apply. It should now work properly.
